KYLE REGO

regoky@outlook.com ◇ 1-508-813-8530 ◇ kylerego.net ◇ github.com/KyleRego

EXPERIENCE

Impero Software   June 2022 - Feb 2024
Software Engineer (Ruby on Rails and .NET)   *Remote*

· Resolved a high volume of support tickets, focusing on data integration issues, application bugs, and production data fixes using Ruby on Rails.
· Worked as part of a Ruby on Rails scrum team, contributing to the development and maintenance of the main web application and its data integration service.
· Led the development of a new .NET-based data integration service, transitioning from Ruby on Rails development and quickly acquiring new skills in .NET and ASP.NET Core.

EDUCATION

Rensselaer Polytechnic Institute (RPI)   *August 2015 - December 2018*
Bachelor of Science in Physics
Overall GPA: 4.0

TECHNICAL SKILLS

Languages	C#, Ruby, JavaScript, HTML, CSS, SQL
Databases	PostgreSQL, SQLite
Frameworks and libraries	Ruby on Rails, ASP.NET Core, Blazor, EF Core, React
Tools	Git, Visual Studio Code

PROJECTS

Anki Books (Ruby on Rails)

· Note-taking and flashcards app that allows the user to download their data as an Anki package file.

Anki Record (Ruby library, SQL, SQLite)

· Provides an API for creating and updating Anki package files which are zip files of multiple SQLite databases, hiding the zipping/unzipping of the file and the SQL to update the databases.

.NET Anki Books (ASP.NET Core, Blazor)

· Flashcards and spaced repetition app that is a partial rewrite of Anki Books.

Larder (ASP.NET Core, React)

· App to assist with personal food/ingredient inventory management and nutrition.

Gallery (Razor Pages)

· Minimal viable product of an artist's website which allows a user to log in and upload images.
